Object Oriented Programming Lab Manual

Course Teacher	Ms. Hina Iqbal
Lab Instructor	Mr. Ahmad Jawad Mustasim
Lab TA	Ms. Mania Shakeel
Section	BSE-2B
Semester	Spring 2026

Department of Computer Science

FAST-NU, Lahore, Pakistan

Lab 4 - Introduction to OOP

Objectives

- Default Constructor
 - Parameterized Constructor
 - Copy Constructor
 - Display Function
 - Destructor
-

Read carefully and attempt following tasks

Mystery Case – Scooby-Doo

The mystery-solving team led by Scooby-Doo has solved multiple mystery cases.

Design a C++ program that defines a class named MysteryCase with the following specifications:

Class Requirements

Data Members

- caseID (int) – Unique identification number of the mystery case
- rewardAmount (float) – Reward earned after solving the case

Member Functions

Your class must include:

1. **Default Constructor**
 - Initialize data members with default values.
2. **Parameterized Constructor**
 - Initialize data members using arguments passed to the constructor.
3. **Copy Constructor**
 - Create a new object by copying values from another existing object.
4. **Display Function**
 - Display the case ID and reward amount.
5. **Destructor**
 - Display a message when the object is destroyed.

Main Function Requirements

- Create one object using the **default constructor**.
- Create one object using the **parameterized constructor**.
- Create one object using the **copy constructor**.
- Call the display function for each object.

-----Happy Coding 😊-----

Submission Instructions

- Submit your tasks on Google Classroom within given deadline
- Submit solution file of each task separately for example “LAB01-TASK01.cpp”, “LAB01-TASK02.cpp” and so on
- Also submit screenshots of output of each task for example “LAB01-TASK01.png”, “LAB01-TASK02.png” and so on
- “.cpp” is the actual file where all your code is saved.
- Always submit .cpp files when asked for submission
- Example path of .cpp file is

Desktop\Your_Roll_No\LAB01-TASK01\LAB01-TASK01\LAB01-TASK01.cpp

Copy your files from this path
